

For 100, 400, 2500 & 6000 m rated depth

MODELS: DS-100 / 400 / 2500 / 6000

Accurate depth sensors for surveying and underwater operations, for stand alone use or combined with GPS positioning system. The DS- series sensors are ideal to use together with Inspecam cameras, SpotLED lights and Control Box GA for indication of the depth / pressure.

The depth as text overlay is superimposed to the image of a camera. Some parameters of the text can be edited and customized as position on the screen, units, title, etc. from a standard keyboard.

SPECIFICATIONS

| SFLUITICATIONS | |
|-------------------|---|
| Rated output | 4-20 mA |
| Accuracy | ±0.2% at full scale. |
| Transmision | 2 wires |
| Supply | 9 – 32V DC |
| Compensated temp. | -40°C to 70°C |
| Fatigue life | More than 100 million cycles. |
| Shock | Exceeds free fall IEC 68-2-32 procedure 1 |
| Vibration | 20G, 10-20000 Hg sinusoidal. |
| | |

| Model Pressure range (bar) Rated depth (m) | DS-100 0-10 100 | DS-400 0-40 400 | DS-2500 0-250 2500 | DS-6000 0-600 6000 |
|--|------------------------------|------------------------------|---------------------------------|---------------------------------|
| Mechanical Housing Diameter (mm) Length (mm) Weight, air (gram) | POM 30 110 180 | SS 30 110 550 | SS 30 110 550 | SS 35 120 640 |
| Connector Standard connector | BH2M | | | |
| Environmental Operating temp | -10°C to 70°C | | | |

Storage temp -20°C to 70°C
