

Control Box WP

Compact & Powerful Underwater Station

FEATURES

Sturdy underwater stations for cameras, lights and oceanographic instruments. The CBX-WP is normally equipped with power supply, light controller, single or multi-channel recorder and other customizable parts and functions.

It can be connected to cameras, lights and instruments by cables and connectors. The CBX-WP is a stable and reliable station, suitable to be fixed on movable parts, for example trawlers, fishing nets and ROVs.

Easy to operate and to play the video / or transfer the data to a pc.
